18 years of VIABLU[™] tradition:

QUALITY – FUNCTIONALITY – DESIGN

A German success story

Outstanding Quality

... starts with the materials used.

Conductors of pure oxygen-free copper, silvered strands and 24k gold plating contacts: For our products, we only use exclusive and premium components. Feel VIABLU[™]'s high quality, e.g. our unique Ultragrip scratch-resistant surface.

High Functionality

VIABLU[™] stands for innovative and technically ambitious solutions like multi-layer cable shields and our specially designed filters to completely eliminate distortion. Solid screw fixings and solder connections guarantee save holds for plugs and cables.

Unique Design

Every VIABLU[™] product is the result of a long and thorough development process combined with a lot of passion for detail. After initial drawings and sketches, 3D-models and prototypes are built. These then undergo several testing cycles in order to ensure our high demands in regard to functionality, quality and design.

The result is a truly first-class listening experience.

Enjoy your music based on products by VIABLU[™]

Intellectual Property Rights

VIABLU[™] is trademark and design protected internationally.

PER FECT.
