18 years of VIABLUTM tradition:

QUALITY – FUNCTIONALITY – DESIGN

A German success story

Outstanding Quality

... starts with the materials used.

Conductors of pure oxygen-free copper, silvered strands and 24k gold plating contacts: For our products, we only use exclusive and premium components. Feel VIABLUTM's high quality, e.g. our unique Ultragrip scratch-resistant surface.

High Functionality

VIABLUTM stands for innovative and technically ambitious solutions like multi-layer cable shields and our specially designed filters to completely eliminate distortion. Solid screw fixings and solder connections guarantee save holds for plugs and cables.

Unique Design

Every VIABLUTM product is the result of a long and thorough development process combined with a lot of passion for detail. After initial drawings and sketches, 3D-models and prototypes are built. These then undergo several testing cycles in order to ensure our high demands in regard to functionality, quality and design.

The result is a truly first-class listening experience.

Enjoy your music based on products by VIABLUTM

Intellectual Property Rights

VIABLUTM is trademark and design protected internationally.
