

If you close your eyes, you'll think it's live!

VIABLUETM meets Mike Smith, UK

Which was exactly what Mike had in mind when setting up his home entertainment system.

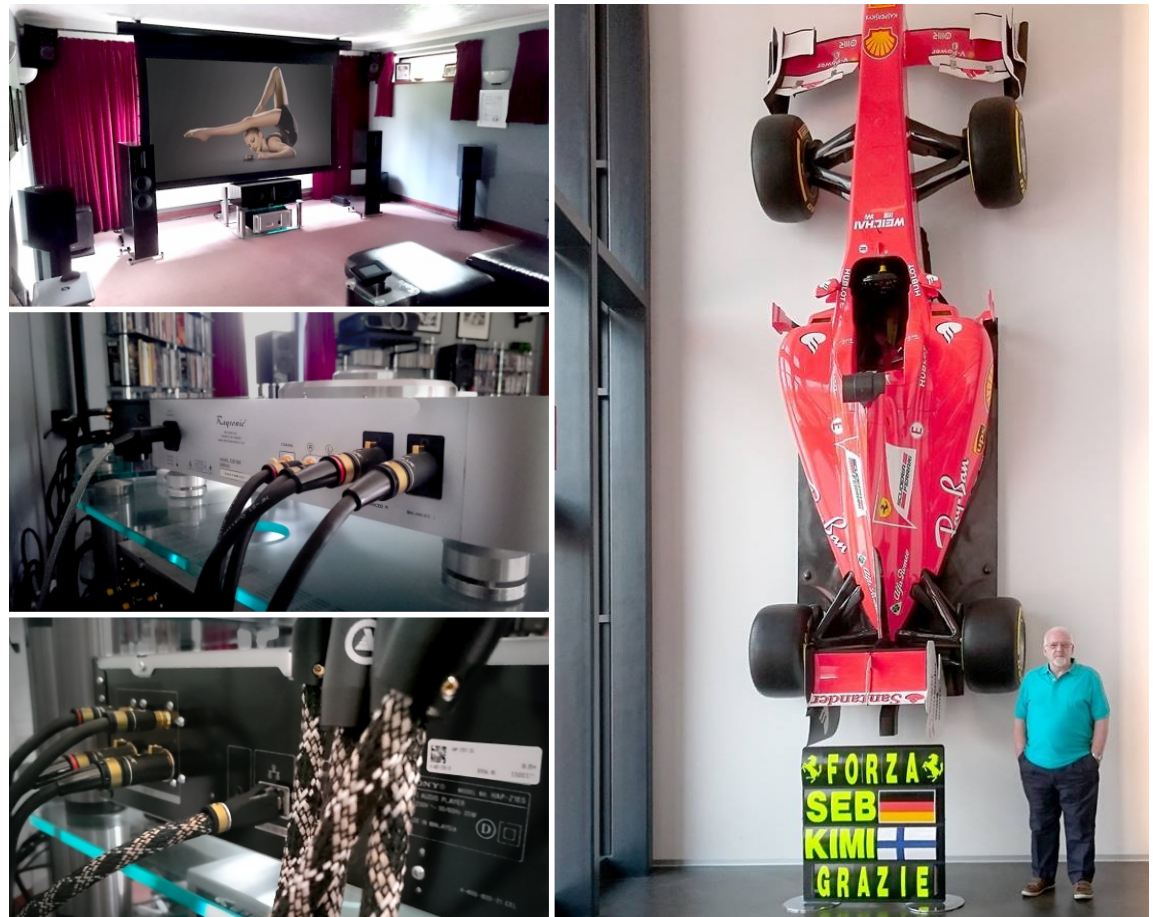

In the 60s, as a “roadie” for a Blues/Rock band, he enjoyed a lot of live music. Still being a music lover, Mike's favorite tune these days comes from Pink Floyd.

His second favorite sound is the roar of F1 racecars competing for championship. Just like at Formula 1, motorsport's premium race series, Mike is always chasing the limit of acoustic possibilities.

With his system based around the new Denon AVC X8500H, 15 loudspeakers and 2 SVS subwoofers – all connected with VIABLUETM cables – he surely gets the sound right. Adding the gasoline smell might be a challenge. 😊

Thanks Mike, for sharing!
