

Werner Enge: Unlimited home-service

## VIABLUETM meets Werner Enge

True, it is rarely the case, but if something just does not sound right with the hi-fi systems of his clients, Werner hops in his Corvette Stingray and – literally – s p e e d s to rescue. He's a master in setting up sound equipment. Customized of course. Even if you just want to try out speakers in your own living room – Werner will set you up without expecting any purchase.

If you are seeking a special listening experience, check out his wares at his small castle in Elze/Germany: You'll find systems of Klipsch Heritage Line, Micromega, OperaAudio and more – all connected with VIABLUETM cables.

Since 15 years, we enjoy Werner's humor and passion for the perfect sound. Thank you, Werner.
